CONFUSED AND BEWILDERED AS A RESULT OF THE SMEAR CAMPAIGN IN THE MEDIA?

Naturally Healthy Publications launches the first in a series of newsletters to put the truth before the public. They are to be distributed via magazines, practitioners and health stores. These are urgently needed to keep you informed so you can make

the best choice in health-care. These publications will feature active solutions to health problems that have been shown in independent studies to produce a definite benefit. This inaugural newsletter is featuring, Serrapeptase, one of the most

dramatic health solutions that is fast gaining a wonderful reputation. Serrapeptase may become the most widely used nutritional supplement of all time, owing to its effectiveness with such a wide range of conditions

IT JUST GETS BETTER AND BETTER

Have you heard of the amazing results of taking Serrapeptase? Serrapeptase is an enzyme originally found in the silkworm (now cultured in the laboratory) that can clear inflamed tissue, dead tissue, blood clots, cysts, scar tissue, arterial plaque and reduces most inflammation.

Serrapeptase offers a viable alternative to drugs such as aspirin, Ibuprofen, and NSAIDS, as well as STEROIDS—a boon for those suffering with rheumatoid arthritis and a wide array of other autoimmune diseases that trigger the inflammatory response. While anti-inflammatory drugs may offer temporary, symptomatic relief from pain, swelling and inflammation, they may also be immunosuppressive and are known to hold dangerous side effects. Serrapeptase, on the other hand, eases pain and swelling with no inhibitory effects on prostaglandins and no known side effects or

How silkworms have put an end to my back pain

By ANASTASIA STEPHENS

The chronic, 18 weeks in Cleveland, the village had turned on its head. The pain was unbearable. I had to take painkillers and I was losing weight. The stress was making me feel like I was in a cage of fear. I was desperate for a solution. I had heard of Serrapeptase and decided to try it. I had heard that it was a natural enzyme that could help with inflammation. I had heard that it was a natural enzyme that could help with inflammation. I had heard that it was a natural enzyme that could help with inflammation.

THE CHRONIC, 18 weeks in Cleveland, the village had turned on its head. The pain was unbearable. I had to take painkillers and I was losing weight. drug interactions. The active enzyme, Serratia E15, is naturally present in the silkworm intestine and allows the emerging moth to instantly dissolve its hard cocoon. It is also used to help digest the tough mulberry leaves that it feeds on. Clinical use of Serrapeptase as an anti-inflammatory in Europe and Asia spans over twenty five years. Good results with: **Pain of any kind:** Arthritis, Rheumatoid Arthritis, backs etc, **Headaches and Migraines,** **Lung Problems:** Emphysema, bronchitis, tuberculo-

sis, bronchial asthma, bronchiectasis etc, **Sinusitis** and other ENT problems such as chronic ear infections and runny nose, **Sports Injuries** traumatic swelling and post operative swellings, Inflammation of any kind: **inflammatory bowel diseases:** Crohn's, colitis, cystitis, **Miscellaneous Conditions:** Fibromyalgia, Internal scars and lesions, Breast Engorgement, Fibrocystic Breast Disease, Enlarged Prostate, Cardiovascular Disease, Varicose Veins.

SERRAPEPTASE USES IN PRACTICE

INTERVIEWS BY WRITER JENNY PULLING

Silkworms are responsible for an amazing enzyme which has been harnessed for medical use. Mulberry leaves, silkworms staple food, has a tough cellular structure. The insects break it down and digest it using secreted bacteria. Now the active enzyme in this bacteria has been harvested to produce Serrazyme. Because of its ability to break down dead tissue or matter throughout the body, the enzyme can be used to treat a wide range of conditions. These range from sinus problems, adhesions, scar tissue, cysts, arthro-sclerosis and vascular disturbances. In Germany, Serrazyme is being used to treat diabetes.

Dr Simon Norton - Epsom Chiropractic Clinic.

Dr Simon Norton who heads the Epsom Chiropractic Clinic is delighted with results. .

"It has greatly improved the quality of many of my patients' lives.

Varicose Veins

I've prescribed Serrazyme for those with varicose veins on their legs which looked like a bunch of grapes. After a few months they've returned with scarcely any sign of disfigurement.

Headaches

"I had another patient with an obstinate frontal headache due to mucus in the sinuses. He had suffered with it for years. After three days on Serrazyme he called me to say that the pain was disappearing and he could feel the dispersed mucus running down his throat.

Lungs

"It has helped smokers too. When they cough up a lot of stuff it is likely to persuade them of the damage they are doing to their health if they continue to smoke."

Nephritis

Dr Norton cites the case of another patient who was suffering from chronic nephritis necessitating high dose steroids.

"She was told she would die if she didn't take them and had given up all hope of

having children," he said. "She came to me because she wanted to reduce the strength of the steroids Serrazyme is a powerful anti-inflammatory without side effects. As a result of taking it, her steroid dosage is reduced from 30 mg to 5 mg and she is planning a family."

Adhesions

The saying 'physician heal thyself' couldn't be more true in Dr Norton's case. He has used the enzyme for himself and members of his family with excellent results. "My son had to undergo major surgery for leg lengthening which resulted in painful adhesions. I used chiropractic techniques to work on his legs for eight years but the condition remained. Then we tried Serrazyme. I was amazed when, after a few months, these adhesions vanished."

Tennis Elbow

Chiropractic is a physically demanding profession, practitioners often develop

"Serrapeptase may become the most widely used nutritional supplement of all time because it's effectiveness with such a wide range of conditions"

Robert Redfern

BIRTH OF A NEW INFORMATION SERVICE!

Naturally Healthy News...Your Newsletter to put the record straight. Are you confused by misinformation being put into the media against Vitamins, Minerals, Herbs and nutrition? Bewildered by smearing stories and other natural remedies by the drugs and medical businesses that are designed to worry and confuse you? You have seen nothing yet! These stories are the same stories they have peddled for years and they are sure to get worse if the media is lazy enough to

keep printing them without checking the facts. Who are these people and why are they spreading such lies? They are the people who run medical, drugs and food processing businesses. Forget the people who work in these businesses, as they are just paid employees doing what they are paid to do. Doctors, Scientist, workers, sales people, medical college lecturers and the like simply do as they are told and are highly paid to keep them in line. If they step out of line they are sacked (yes even

GP's). The real people behind it are those who run the whole show. They have taken over the regulatory bodies and are systematically trying to take all of the nutrients and natural remedies that keep people healthy off the shelves. Why would they do this? Profit. They pretend to be healthcare organisations but in truth they are diseases care businesses. The drug companies do not make profit when you are healthy, only when you are sick and diseased.

YOGA TEACHER DOES HEAD STANDS AGAIN — THANKS TO SERRAPEPTASE

“Of course we’ve known it for years,” says David Snow. Good nutrition and a healthy life style are the foundations of health. ‘Detox’ may have become a buzz-word, but it has been part of naturopath philosophy for a long, long time. “I am an acupuncturist and not formally trained in nutrition but I can and do make suggestions of supplements, dietary and lifestyle changes where they seem appropriate. And I’m always interested to hear of therapies and supplements my clients have used to good effect”.

“Serrapeptase came to my notice recently while I was

treating a 68 year old yoga teacher. She is a very active woman but suffers from neck and back pain that adversely affects her life.”

Anti-inflammatory

David uses Acupuncture or Electronic Acupressure (HealthPoint) to keep everything moving. He was interested, however, when she told him she took Serrapeptase finding it a powerful anti-inflammatory that really helped control the pain.

“‘The pain returns the moment I stop using it’ she told me.

Breast Cysts

I was also interested to hear that both the cyst in her breast which she has had drained and a cyst in her eye have not returned.

Heart Disease

I’m interested to hear that Germany is taking Serrapeptase very seriously as a supplement in the treatment of heart and regenerative disease.”

David is based in Sheffield and works holistically, even where the surroundings of his clients are concerned. A trained Feng Shui practitioner and a dowser, he will visit people in their homes if a condition is obstinate in clearing up.”

“My advice generally is to look into your life style and diet and see how specific supplements like Serrapeptase may help.”

JANET SPENCE - NATUROPATH SOLIHULL CLINIC

Naturopath, Janet Spence is yet another practitioner whose satisfaction with Serrazyme has prompted her to take it herself.

This is a wide spectrum nutrient,” she says. “Rather like vitamin C therapy or aspirin, it is multi functional.”

Her treatment method usually begins with a cleansing and detox-programme. To this she will add amino acids and liver support. She then prescribes supplements and nutrients indicated for particular health problems.

“I use Serrapeptase for pain control as it is a powerful anti-inflammatory thus reducing or even eliminating the use of steroids. Currently I am monitoring its use in controlling high levels of the ‘wrong’ kind of cholesterol.

As a nutrient it seems well

accepted, none of my patients appears to have suffered any side effects even when on very high doses.”

Ms Spence is enthusiastic about the role of Serrapeptase in treating venous conditions. The problem of blood clots after air travel has been in the news over past months.

“I’m prescribing Serrapeptase to patients who are planning a long haul flight. They take it two months before departure and another two months on their return. Some of my elderly patients like to stay on a low dose all the time, rather like those who take a continual low aspirin dose.”

The anti coagulant drug Warfarin is not well supported by some people. That presents a dilemma, as they may be suffering from high blood pressure and run the risk of thrombosis. Ms

Spence is pleased with the progress of one such patient.

“Warfarin was killing her when she came to consult me. I put her onto Serrazyme and other anti coagulants. Her GP is happy for us to be doing this as there is no other drug he can use. I find this very encouraging and am now monitoring its use in the treatment of varicose veins.

Just another practitioner who is discovering the myriad uses of Serrazyme.

Jenny Pulling

“It has greatly improved the quality of many of my patients lives. I’ve prescribed Serrapeptase for those with varicose veins on their legs which looked like a bunch of grapes. After a few months they’ve returned with scarcely any sign of disfigurement”

Anti-inflammatory and Natural Chelation

(Dr Simon Norton—Continued from page 2)

'tennis elbow' It is a very painful condition as Dr Norton knows but, again, Serrazyme came to the rescue. Rheumatoid arthritis also responds to this therapy, keeping pain under control.

Dr Norton is also surprised by the speed the enzyme appears to work.

"Chelation therapy time has been reduced from three years to one and I've had patients, who were huffing and puffing, playing bowls in a remarkably short time."

The clinic's approach is a holistic one. It aims to encourage people to build their health by making life style changes and using appropriate supplements. The silkworm's secret has yielded a very useful one.

SERRAPEPTASE QUESTIONS AND ANSWERS

What is Serrapeptase?

Serrapeptase is a proteolytic enzyme isolated from the micro-organism, *Serratia E15*. This enzyme is naturally present in the silkworm intestine and is processed commercially today through fermentation. This immunologically active enzyme is completely bound to the alpha 2 macroglobulin in biological fluids. Histologic studies reveal powerful anti-inflammatory effects of this naturally occurring enzyme.

What does it do? Serrapeptase digests (dissolves) non-living tissue, blood clots, cysts, and arterial plaque and inflammation in all forms.

What happens to the residue? This is mainly converted to basic amino acids and is usefully recycled into the body. Any other residue is excreted in the usual manner.

Has it any side effects or can I take too many? No side effects have been found in over 25 years of studies and usage. Many people take very high doses to speed-up the relief e.g. in cases of sports injuries which can be as high as 30 per day with no side effects

whatsoever except a faster recovery. It is even safe for children of 2 years+ for a wide range of conditions: (asthma, lung problems, arthritis, etc).

Why can it benefit so many different conditions? Although Serrapeptase simply digests dead and inflamed tissue these two problems are the cause of the majority of symptoms in the body. The wide range of conditions that respond to Serrapeptase include:

- Varicose Veins and other circulatory problems
- Pain problems such as, Arthritis, Joints, and Muscles Pains and even MS.
- Lung Diseases such as Emphysema, Asthma, Bronchitis and Bronchiectasis.
- Sinus and other ENT problems
- Post Operative Healing, Lesions and Cysts (breast, ovarian etc)
- Arterial Plaque, DVT (good for travellers) and Blood Clots
- Migraines (vascular).
- Enlarged Prostate and many more (see studies).

Can I use it for any condition, even those not listed? It is worth a try for practically anything. If you have great discomfort it is worth taking a high dose for one week which should give great relief.

Can it be used on animals such as cat and dogs?

Yes it has proven to be very effective on all animals. Many veterinarians are now prescribing it as well as arthritic pet owners sharing their own bottle with their arthritic dog to great effect.

I can understand internal scars (lesions and adhesions) but what about external scarring, how can it help this?

It will still work on surface scarring just as it will on diabetic ulcers and the similar problems. By continually digesting the scar tissue, healthy tissue will eventually replace the old scar. It may not completely eradicate all of the scarring but the worse the scarring the better the visual benefits.

Can it be taken with other medication and do I need to inform my Doctor? Yes it can be taken with any medication and may mean that you will be able to stop taking them.

WE URGENTLY NEED YOUR STORIES

Do you use Serrapeptase in your practice, or just for yourself? How are you progressing with it? Every day we are getting wonderful verbal feedback about the success of Serrapeptase and the wide range of conditions it is helping. What we now want is to get these written-up by our writers and publish them in

the Newsletters. This will help to help spread the message that Serrapeptase is a powerful aid to recovery. If you prefer not to have your name used, that will be fine. Just call or email your details and our writer will telephone you to get the details. If you are agreeable, a photograph of the person using or pre-

scribing Serrapeptase would be most welcome and this can be by post or email. The stories will be going into the Serrapeptase Newsletter as well as the www.serrapeptase.info web site. So come on. Call us now and inspire others to make a difference to their health.
